CODING PROJECTS

FILMSTACK, WWW.FILMSTACK.XYZ

- ❖ Allows anyone to discover movies by decade, genre, and/or runtime.
- ❖ Designed and implemented a client UI with custom widgets and a backend API to handle queries.
- ❖ Wrote a Node script to translate the raw data sourced from the OMDb API into a 700mb database.

THE PATH, WWW.THEPATH.XYZ

- ❖ A game meant to teach programming concepts like conditionals, loops and step execution.
- ❖ Designed and implemented a player profile page where users can see their progress and choose the next game level.
- ❖ Setup authentication via local email and password, Facebook OAuth, and Google OAuth using Passport.js.
